

HOT START *Taq* DNA Polymerase (500 Units)

Cat No. 110043

DATA-SHEET

Hot Start *Taq* DNA polymerase is an optimized mixture of *Taq* DNA polymerase and anti-*Taq* DNA polymerase monoclonal antibodies. Antibodies block polymerase activity during set-up of the PCR reactions at ambient temperature (20-22°C). The inhibition of *Taq* DNA Polymerase is reversed when the temperature is above 70°C. The PCR products obtained with Hot Start *Taq* are free from non-specific products and primer-dimers.

UNIT DEFINITION :

One unit of activity is defined as the amount of enzyme required to incorporate 10 nmoles of dNTP's into acid-insoluble DNA fraction in 30 minutes at 72°C.

CONCENTRATION SUPPLIED : Enzyme is supplied at a Concentration of 5U/μl along with one vial of 10X buffer, one vial of additional MgCl₂ & one vial of DNA's free water.
